

ONI OYINDAMOLA

LESSON ONE

BASIC SCIENCE AND TECHNOLOGY

- Aspect:Basic science.
- Topic:Changes In Nature.
- Subtopic:Meaning Of Change.
- Class:Primary4-6(Upper primary)
- Target:8-10Years
- Learning Resources:Paper,Lighter,Hot water,cup,video clips.

○ Learning objectives: Learners should be able to; Define change, observe the reactions that occurred and brought about change.

○ Starter: Teacher should firstly allow learners reflect a little on the weather around them, either cold or hot.

When an object or substance becomes different from its normal form, we observe that change has occurred. Therefore change in nature can simply be reversible or irreversible.

Change can also occur in living and non living things.

- Presentation in steps:

- a. Teacher explains first by showing short video on different weather conditions.

- b. Teacher should practice little experiment of paper burning.

- c. Teacher to explain in details what the experiment comprises of.

- ◆ Summary: Teacher should give assignment to
